Auger filling machine : PFNS VFFS Zipper Model: TWFX-Z & Parallel robot casing line

An integrated system with Auger filler and the latest VFFS with in-line zipper device. In the 'wide-top bag' style, we will demonstrate the automatic casing system using parallel robot as post-process.

Show presentation

East Hall 5 Booth no.5G-37

Overwrapping machine: ARZZD1

The best-selling paper overwrapping machine with strengthened the basic function of wrapping finish, easy for maintenance and user friendliness.

Pocket Zip™ : TWFX3IL

This would be a solution to produce cost-effective zipper bag by TWFX by using roll film with opening tape, simple and space-saving machine without having zipper device.

Line system of Cooperative robot – Caser- Palletizer

For small lot production or limited installation space, this automatic casing and palletizing system would fit as labor-saving solution.
